

ZARU Token — Audit Overview

BNB Smart Chain (BEP-20)

Audit status

Internal review: Completed (manual logic review finalized; no critical issues found)

External audit: Scheduled with an independent security firm; full report pending publication

The full external audit report will be published upon completion. A placeholder document is available below for reference.

Tools used

- Slither:** Static analysis for common vulnerability patterns
- MythX:** Automated vulnerability scanning
- Manual logic review:** End-to-end code path and access control verification

Summary of findings

- Critical vulnerabilities:** None detected
- Gas optimization:** Opportunities identified (non-blocking; can be applied in future iterations)
- Standards compliance:** Contract conforms to BEP-20 requirements

Documents
